# Zero Added Sugar

Sugar: it's been front and centre in food trends for years now. Specifically, the trend toward less sugar. The demand for all-natural and reduced-sugar products continues to increase. This development, however, quickly yields a dilemma for consumers like yourself. Because often, less sugar means less flavour as well. Verstegen is breaking this pattern with its Guilt Free sauces.

Guilt Free sauces offer a perfect alternative to the regular sauces in your professional kitchen. They offer the freedom to choose a responsible food option - one that also happens to be the tastiest available!

**The sauces are available in four flavours:**
