## CRISPY BREADING ASIAN

**Appearance**  
Yellow, beige coloured breeding with coarse vegetable pieces mixed with crunchy cornflakes.

**Taste**  
Asian spices, galangal, cumin and ginger are used as a base flavour for this Crispy Breeding. Coarse vegetables including, leek, roasted onion, cabbage and chives are used to complete the Asian flavour.

**Application**  
For any meat as a schnitzel using our range of batters, also delicious as a crunchy topping for tray bakes and ready meals.

## CRISPY BREADING CHEESE & ONION

**Appearance**  
Vibrant yellow colour with pieces of onion, garlic, chives and crunchy cornflakes.

**Taste**  
Cheese & Onion flavours are prominent in this breeding. Perfect with pork and chicken, a real savoury, tradition flavour, well known to all.

**Application**  
Can be used on corden bleu's, kiev's and scotch eggs as well as the more traditional schnitzel. An interesting addition to gratins and vegetable dishes.

## CRISPY BREADING SPICY TOMATO

**Appearance**  
Orange-red breeding with pieces of dried tomato, carrot, garlic, parsley, chilli and crunchy cornflakes.

**Taste**  
Chilli and smoked paprika combine with tomato, carrot and onion creating a rounded spicy tomato flavour.

**Application**  
For coating all meats and vegetables, used in conjunction with our range of batters. Try on goujons, bombs and truffles to really expand your counter offerings.

## Sustainable Values

We are proud of our unique and sustainable collaboration with local farmers in the countries of origin. By using high quality technological solutions and applying optimal quality control, we can keep the chain from farmer to consumer fair, transparent and sustainable. See our sustainable programs that are helping make this happen.

**Blockchain** - More and more consumers need more information about the origin of ingredients, responsible nutrition and conscious cooking, Verstegen responds to this need with blockchain.

**Agroforestry** - Agroforestry is the sustainable agricultural method officially called "regenerative agroforestry". This method has different crops on the same piece of land that absorb Co2 from the air.

**SpiceUp** - SpiceUp makes geo information available to support 100,000 pepper farmers in Indonesia. This information is used to improve the quality and quantity of pepper production.
